

Safety Recommendation of Union-wide Relevance: FI.SIA-2017-0004 - Finland – SIA

A new recommendation of Union-wide Relevance has been inserted into the European SRIS Database:

Recommendation ID: FI.SIA-2017-0004 **Originator:** Finland - SIA **Status:** Open

Union-wide Relevance (SRUR)

Date issued: 21.6.2017

Addressee: International Organisations - EASA

Headline: Aeromedical examiners' competency based recurrent training

Recommendation Topic(s): 1.Medical / Human Factors

Some AMEs carry out a low number of aeromedical assessments and the vast majority of their medical activity is spent in performing other medical tasks. Especially their proficiency in performing an aeromedical risk assessment may not be at the intended level.

The Safety Investigation Authority recommends that The European Aviation Safety Agency (EASA) improve AME risk assessment competency through safety promotion, competency based recurrent training and specific training on the national procedures for referral and consultation as well as for the use of limitations.
